Re: PCB & MIREX FISH DATA INVENTORY

This report is an inventory of PCB/Mirex data on Ontario fish. The fish collections were made by the Ministry of Natural Resources and the analyses were carried out by the Ministry of the Environment. Excluded from the report are summaries of fish collections for which no length or weight data was available, or which were too small to be statistically significant.

The data has been organized according to Ministry of the Environment regions. Data on the Great Lakes has been presented to reflect the statistical districts defined by the Ministry of Natural Resources.

The inventory will be updated on a yearly basis to incorporate new data.

Yours truly,

Gerald C. Ronan

SUMMARY:

This report is an inventory of the PCB/Mirex Data currently available at the Ministry of the Environment Laboratory Services Branch. It includes statistical summaries of 4681 fish from 216 locations in Ontario. The data is presented alphabetically for each Ministry region.

INTRODUCTION

PCB's

Polychlorinated Biphenyls (PCB) are a manufactured product for use in electrical transformers and capacitors. Prior to 1975, however, their use was not restricted to this area and they were found in a wide range of applications including incorporation into: paints, varnishes, plastics, hydraulic fluids, etc. This wide spread use of PCB and their inherent biological and chemical stability, has led to world-wide contamination of waterways, fishes and water fowl. Even remote non-industrialized areas such as Northern Ontario carry a certain degree of PCB contamination due to airborne transfer and use of waste PCB oils for dirt road spraying (for dust control).

Mirex

Mirex is another manufactured product which has two main uses. One was the control of fire-ants in the eastern U.S., the other as a fire retardant in many finished products. In this application it has the name Dechlorane 510.

Due to the manufacture and grinding of Mirex by U.S. companies located adjacent to the Niagara River, Mirex (Dechlorane 510) has been found only in Lake Ontario and the St. Lawrence River to this date.

Due to the widespread contamination of PCB and the localized contamination of Mirex the Ministry of the Environment in conjunction with the MNR initiated a continuing programme to analyze fish from many different lakes in Ontario as well as the Great Lakes, to check levels of these and other persistent organic contaminants in edible portions of fish.

This report is an inventory of PCB/Mirex data on hand at the Laboratory Services Branch. It does not include all data on PCB/Mirex levels, but does contain the data suitably available at this time.

Mirex data is not presented for collections prior to mid 1975, when it was first detected in Ontario by CCIW at Burlington.

Excluded from this report are summaries of fish collections for which no length or weight data were available or which were too small to be statistically significant.

The analysis of PCB/Mirex in Ontario is an ongoing programme and so periodic updates of this report will be prepared (likely on a yearly basis).

DATA PRESENTATION

The summaries for inland waters have been organized according to Ministry of the Environment regions (see Fig 1). Within each region, the lakes are listed alphabetically. Data on each of the Great Lakes has been broken down according to statistical districts defined by the Ministry of Natural Resources.

Lake names and latitude/longitude are according to the Gazetteer of Canada, where appropriate, and those water bodies not listed in the Gazetteer have names and locations according to information given by field personnel responsible for the fish collections. PCB/Mirex data is presented by species (see Table 1). For each species, the number of specimens comprising the sample (N) is recorded along with the arithmetic mean and ranges of the PCB and Mirex concentration (ppb or ng/g), length (cm), weight (g), as well as the percentages of PCB or Mirex concentrations in the sample exceeding the guideline for unrestricted consumption.

For species with five or more representatives a regression analysis has been performed. The model used is one with both parameters (PCB or Mirex and length) transformed by natural logarithms. The product moment correlation coefficient is tested ($H_0: r=0$) and if it is found to be different from zero ($p < 0.05$), an "AB" breakdown is performed.

This breakdown is an indication of PCB or Mirex concentration ranges to be found in length ranges included in the samples. The "AB" is assigned by solving the regression equation at the upper limit of the length range. The letters are assigned to length ranges found in the samples extended at both ends by 10%.

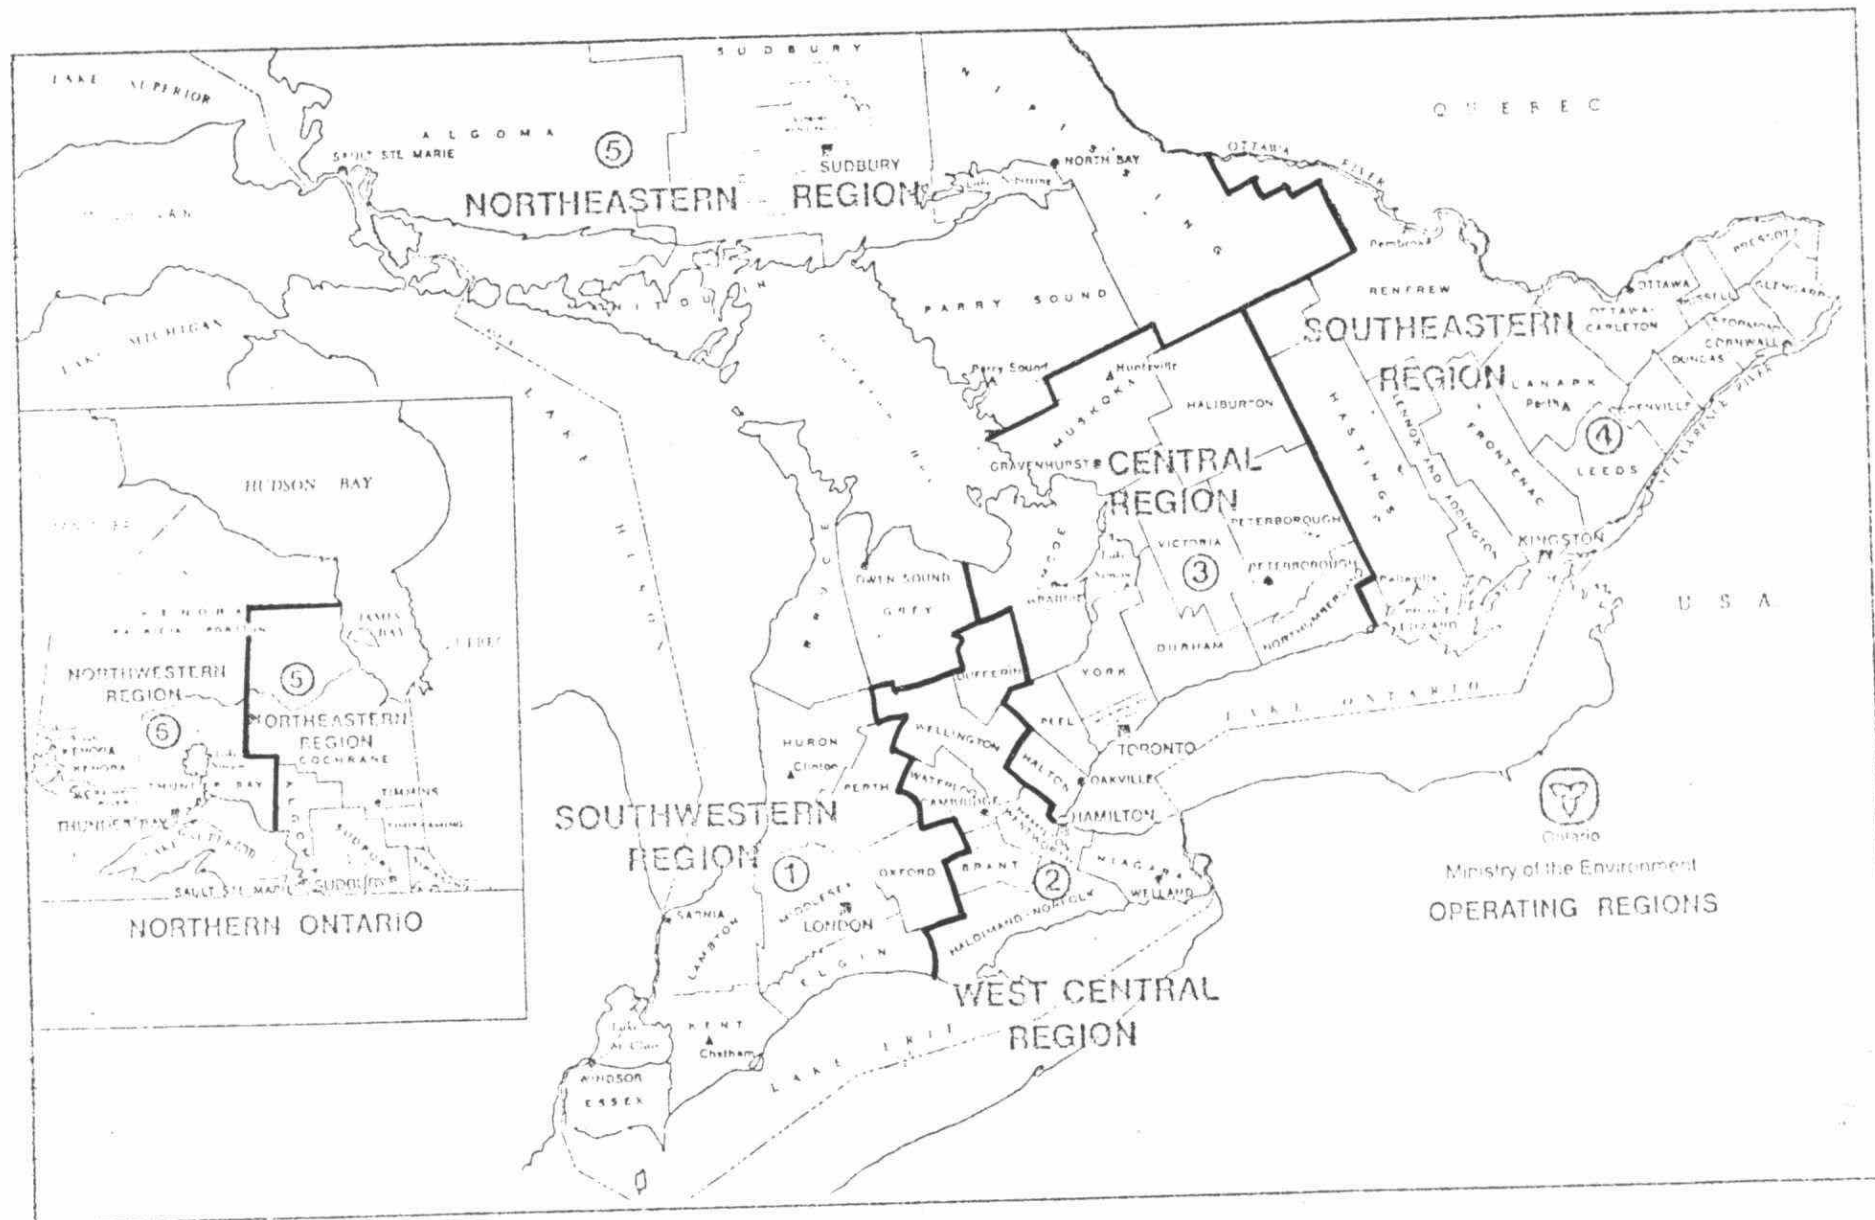

Note: All smelt samples are 10 fish composites.

TABLE 1
SPECIES LIST

<u>DESIGNATION IN SUMMARIES</u>	<u>COMMON NAMES</u>	<u>PROPER NAMES</u>
ALEWIFE		<i>Alosa pseudoharengus</i>
B. BULLHEAD	Brown bullhead	<i>Ictalurus nebulosus</i>
B. CRAPPIE	Black crappie	<i>Pomoxis nigromaculatus</i>
BLUEGILL		<i>Lepomis machrochirus</i>
BOWFIN	Dogfish, lawyer	<i>Amia calva</i>
BROOK S.	Brook silversides	<i>Labidesthes sicculus</i>
B. SHINER	Black shiner	<i>Notropis heterodon</i>
B. TROUT	Brown trout	<i>Salmo trutta</i>
BURBOT	Ellpout, lawyer, ling, maria	<i>Lota lota</i>
CARP		<i>Cyprinus carpio</i>
C. CATFISH	Channel catfish	<i>Ictalurus punctatus</i>
CHINOOK	Chinook salmon	<i>Oncorhynchus tshawytscha</i>
CISCO	Cisco, lake herring, tullibee	<i>Coregonus artedii</i>
COHO	Choho salmon	<i>Oncorhynchus kitusch</i>
E. SHINER	Emerald shiner	<i>Notropis atherinoides</i>
EEL	American eel	<i>Anquilla rostrata</i>
F.W. DRUM	Freshwater drum, sheepshead	<i>Aplodinotus grunniens</i>
G. SHAD	Gizzard shad	<i>Dorosoma cepedianum</i>
GAR PIKE	Longnose gar	<i>Lepistoseus osseus</i>
GOLDEYE		<i>Hiodon alosoides</i>
L. N. SUCKER	Longnose sucker	<i>Catostomus catostomus</i>
LOGPERCH	Logperch darter	<i>Pereina caprodes</i>
L.M. BASS	Largemouth bass	<i>Micropterus salmoides</i>

DESIGNATION IN SUMMARIES	COMMON NAMES	PROPER NAMES
L. TROUT	Lake trout	<i>Salvelinus namaycush</i>
MENOMINEE	Round whitefish, round fish	<i>Prosopium cylindraceum</i>
MOONEYE		<i>Hiodon tergisus</i>
MUSKIE	Maskinonge, lunge muskellunge	<i>Esox masquinongy</i>
PIKE	Northern pike	<i>Esox lucius</i>
P' SEED	Pumpkinseed, sunfish	<i>Lepomis gibbosus</i>
Q.C. SUCKER	Quillback carpsucker Quillback sucker	<i>Carpiocles cyprinus</i>
RAINBOW	Rainbow trout, steel- head	<i>Salmo gairdneri</i>
R.H. SUCKER	Redhorse sucker	<i>Moxostoma macrolepidotum</i>
R. BASS	Rock bass	<i>Ambloplites rupestris</i>
SAUGER		<i>Stizostideon canadense</i>
SISCOWET	"Fat" lake trout	<i>Salvelinus namaycush</i>
S.M. BASS	Smallmouth bass	<i>Micropterus dolomieu</i>
SMELT	Rainbow smelt, American smelt	<i>Osmerus mordax</i>
S. TROUT	Speckled trout, brook trout	<u><i>Salvelinus fontinalis</i></u>
T. PERCH	Troutperch	
WALLEYE	Pickereel, yellow pickereel dore	<i>Stizostideon vitreum</i>
W. BASS	White bass	<i>Morone chrysops</i>
W. CRAPPIE	White crappie	<i>Pomoxis annularis</i>
WHITEFISH		<i>Coregonus clupeaformis</i>
W. PERCH	White perch	<i>Morone americanus</i>
W. SUCKER	White sucker	<i>Catostomus commersoni</i>
Y. BULLHEAD	Yellow bullhead	<i>Ictalurus natalis</i>
Y. PERCH	Yellow perch	<i>Perca flavescens</i>
